

Configuring Email on Mobile Devices

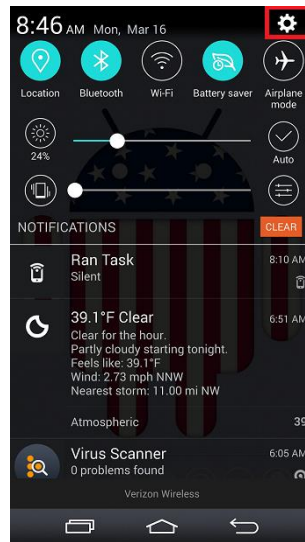

Contents

Android - IMAP.....	3
ANDROID - POP3	7
iPhone – IMAP.....	11
iPhone - POP3	15

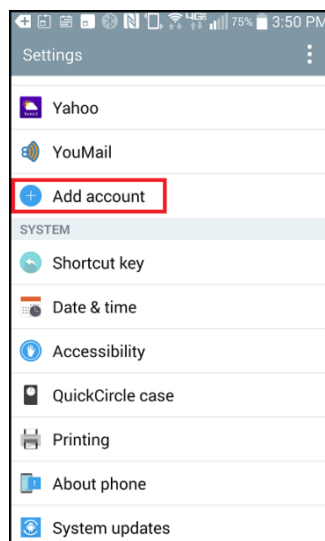

Android - IMAP

The look and feel of each Android device can be different based on your software version and wireless vendor. The sample below is one version and yours may look different, but the steps should be the same or very similar.

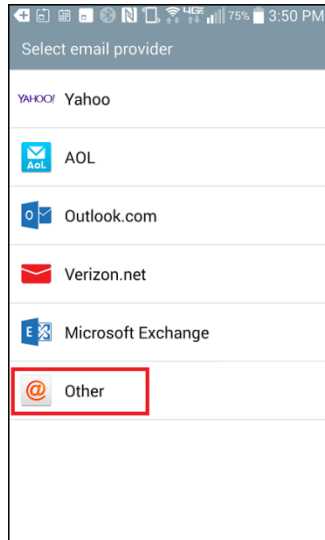

Begin by navigate to settings

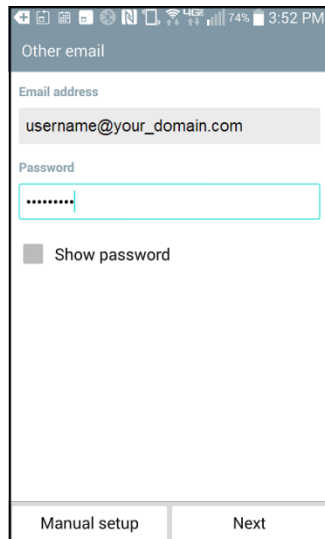

Select "Add account"

Choose "Other" as your email provider

Enter your full email address and password

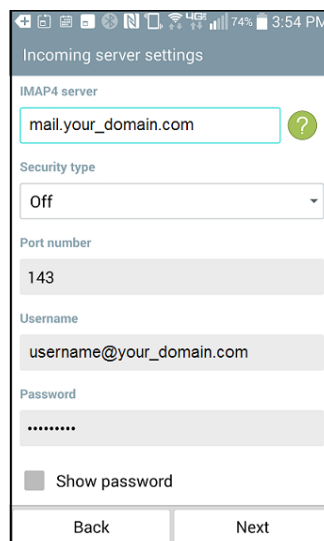

Select IMAP4 and click "Next"

Enter the following and click "Next":

- IMAP4 server box: mail.your_domain.com (your_domains is the part of your email address that follows the "@" sign)
- Security type: Off
- Port: 143
- Username: Enter your full email address
- Password: Enter your password

Enter the following and click "Next":

- IMAP4 server box: mail.your_domain.com (your_domains is the part of your email address that follows the "@" sign)
- Security type: Off
- Port: 587
- Username: Enter your full email address
- Password: Enter your password
